

THE UN-SNEAKER

OR, HOW TO TEACH AN OLD DOG NEW KICKS

Dogs are smart. They know walking is good for them, and for you. Maybe they don't know from triple-density comfort insoles and breathable leather lining. And they're entirely unaware of how crazy popular this particular shoe has become. What do they know? They know that when you wear them they get a longer W-A-L-K. Believe it or not, dogs can also be a little...catty, so

don't embarrass them with your old shoes. While these feel like sneakers, they don't look like them. Once upon a time, Fido used to greet the master by bringing him his slippers. With the Un-Sneaker, that would be a step down comfort-wise. Like we say, dogs are smart. The Un-Sneaker: Things just got un-real.
